

Lead Java Backend Engineer

Spring Boot, Microservices & Cloud Architecture

EXPERIENCE

10+ Years

Lead Level

AVAILABLE FROM

Immediate

Ready to start

CERTIFICATIONS

AWS Certified

Solutions Architect

CORE TECH STACK

Java 17+

Spring Boot

Hibernate

Microservices

REST APIs

AWS Cloud

PostgreSQL

Docker

Kubernetes

Maven

SIGNATURE PROJECT

E-Commerce Platform Modernization – 5M+ Monthly Users

Top Indian E-Commerce Company • 3+ Years • 20-Person Backend Team

Challenge

Re-architect monolithic Java application into cloud-native microservices on AWS, handling peak loads of 50K+ concurrent users during flash sales.

Key Outcomes

- 40+** Microservices deployed on AWS EKS (Kubernetes)
- 5x** Better performance during peak load (flash sales)
- 80%** Cost reduction through auto-scaling and optimization
- 99.99%** System uptime during major sales events

Tech-Stack: Java 17 • Spring Boot • Hibernate • AWS EKS • PostgreSQL • Redis • Docker • Kafka • REST APIs

OTHER RELEVANT PROJECTS

Payment Gateway Integration • FinTech Startup

- Design and development of secure payment processing with PCI-DSS compliance
- Integration with multiple payment providers (Stripe, Razorpay, PayPal)
- Implementation of fraud detection system reducing chargebacks by 70%
